Abstract from Introduction and Management Summary

At the request of T & C Contracting, Inc., the Glenn A. Black Laboratory of Archaeology, Indiana University (GBL) performed a cultural resources survey of the proposed location for excavation of a borrow pit northeast of Valeene, Orange County, Indiana. The project area boundaries were staked prior to the survey. A total of approximately 1.25 acres was surveyed.

The purposes of the survey were 1) to identify and document all of the cultural resources in the project area, 2) to evaluate any sites with regard to their eligibility for inclusion on the National Register of Historic Places (NRHP) and the Indiana Register of Historic Sites and Structures (IRHSS), and 3) to make recommendations for the protection of significant and potentially significant sites.

Fieldwork was conducted August 13, 1999 by GBL archaeologists Patrick K. O'Brien and Mary E. Pirkle. No cultural materials were discovered in the project area. Cultural resource clearance is recommended for the project area provided that all earth-moving activities are restricted to the current proposed area of impact.
